February 18, 2020 - Campuswide email

Dear Students, Faculty, and Staff,

I write with an update that all of our students who were isolated and under restricted movement based on the recommendation from the Kentucky Department for Public Health have been cleared to resume their regular activities. Kathy Jones, our director of student health, received the very good news just a few hours ago.

We all owe Kathy a debt of gratitude for handling this situation with such professionalism and grace, a compliment I extend to many others involved in this process and to the campus as a whole for its patience and understanding.

The care and compassion with which this situation was handled is testament to the fact that “community” is both a noun and a verb at Centre College.

My best,

John - (P. Roush)
